

Voting in Dexit Network:

- ❖ Voting is a mechanism where validators can create proposals to change the size of maximum validators and to change the minimum staking amount then other active validators will vote for that proposal.
- ❖ Any active validator can create the proposal.

The screenshot shows the Dexit Network website with a navigation bar including Home, Stake, Un-Stake, Blocks, Faucet, Voting, and Validators. The Validators Leaderboard table lists six active validators with their addresses, amounts, voting powers, and delegation options.

Rank	Address	Amount	Voting Power/%	Status	No. of Delegators	Delegate	Income	Total Income

- ❖ Any Validator who wants to create the proposal, click on the create proposal. In the details field validator can only write a maximum of 100 letters and from the variable name field he can select one field at a time. In the set value he can write the value according to the selected field.
- ❖ **MaxValidators:**
- ❖ If the validator creates the proposal to change the size of maxValidators. Validators can't create the proposal to change the maxValidators size greater than or equal to 51 and less than or equal to 3 maxValidators.
- ❖ **minimumStakeAmount:**
- ❖ If the validator creates the proposal to change the minimumStakeAmount. Validators can't create the proposal of less than 1 DXT and more than the highest amount staked by the currently active validator.

[INFO](#)

- ❖ By clicking on Info, the validator can see the status of his proposal.

If 51% or more of the validators agreed on that proposal then the proposal will get applied on that proposal (maxValidator or minimumStakeAmount) and If 51% or less of the validators disagreed on that proposal then the proposal will not get applied on that proposal (maxValidator or minimumStakeAmount).
